What is the weTHINK.eu European Cyber Security Network?

- Who do we bring together?
 - weTHINK.eu European Cyber Security Network brings together all key cyber security actors (government agencies, critical infrastructure providers, companies, banks, ministries, industry associations, cyber security companies, NGOs) from Europe.
- How do we bring them together?

- o Through closed groups on the online crowd knowledge platform - weTHINK.eu.
- o Through online meetings and a yearly online conference.
- Why do we bring them together?
 - o To regularly exchange information and best practices on cyber threats and mitigation strategies and tactic.
 - o To analyse and forecast future cyber threats.
 - o To develop mitigation strategies and tactics.
 - o To simulate threat strategies and tactics and mitigation strategies using online cyber ranges.
 - o To facilitate cooperation between all key actors in Europe to develop joint projects to improve cybersecurity.
 - o To help companies and municipalities to prepare for near future cyber threats.
 - o To strengthen the position of European societies and companies.
